Profile

My name's Toan. Born in 2002 and a recent graduate from FPT Polytechnic Danang, I am a driven web developer with over a year of experience in real-world projects. Inspired by the notion that "IT is the king of professions," and stories like that of the "mechanical brother born in '96," I am eager to advance my career with a goal of becoming a Senior Frontend Developer within the next four years. I am excited to embrace new challenges and am committed to leveraging my skills to deliver exceptional web design solutions.
